

Survey analysis using powerbi

- 1.First download the survey report csv
- 2.transform the data for the visualization
3. We are making powerbi project so its better clean the data using the query editor on powerbi
- 4.After cleaning the data for our visualization make a plan to how to display the data in simpler form.
- 5.Note: For better representation don't make many of charts for visualization.
- 6.I have uploaded a csv file as well as the representation file for the preview.
- 7.The above file make the survey report very easy to understand.
